

## 2020 NEW Product Macaron UVC-LED Sterilizer

**UVA/UVC-LED +  
TiO<sub>2</sub> photocatalyst**

**Kills 99% of bacteria & virus  
in 1 min.**

**Double Sterilization Effect:** ultraviolet (UVC + UVA) & TiO<sub>2</sub> photocatalyst double sterilization. Sterilization with no dead ends, and sterilization effect ≥99.99%.

**Purify the Air:** It's made with Japanese company "Shin-Etsu" photocatalyst to effectively eliminate odors and harmful gases in the air.

# Macaron UVC-LED Sterilizer

**High-Efficiency Concentrating Reflector:** using highly reflective material, concentrated reflection of ultraviolet light to enhance sterilization.

**6 UV LED Design:** 3 UVC + 3 UVA have larger sterilization area and double the sterilization intensity.

**Safety Switch Design:** Press the switch key for 2 seconds to turn it on and avoid children's accidental touch.

**6+60 Sterilization Mode:** The first stage of deep sterilization for 6 minutes and the second stage of rapid sterilization in 60 seconds, it will automatically shut down after sterilization.

**2 Power Supply Options:** 2 AAA alkaline batteries can be used, or an external USB mobile power supply can be used.
